CURRENT PSYCHIATRY REPORTS

EDITOR-IN-CHIEF Robert O. Friedel
Dwight L. Evans

2010

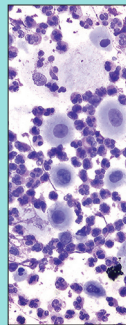

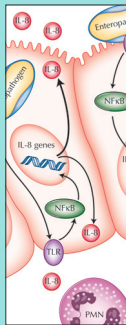

FEATURED SECTIONS

AVAILABLE ONLINE AND IN FULL COLOR

- Six bimonthly issues
- 80% clinical / 20% basic science content
- 60-70 articles per year
- Annotated references
- Clinical trial reports

Table 2. Conventional and emerging treatments

Treatment	Findings/Notes
Oral agents	
SR vs SR oral morphine	In randomized controlled morphine for SR and 4 hours and SR morphine in the acute setting, SR (27.4 x 4 mg).
Efficacious morphine	This randomized, open-label study compared SR morphine with SR morphine.
Subacute release oxycodone	This randomized, open-label study compared SR morphine with SR morphine.
SR hydromorphone	This randomized, open-label study compared SR morphine with SR morphine.
Oral methadone	In this randomized, controlled trial, SR morphine was superior to SR morphine.
IV agents	
TD buprenorphine	These open-label studies are needed to clarify the role of buprenorphine in a randomized, controlled trial comparing buprenorphine with SR morphine.
IV hydromorphone	In two open-label studies, SR morphine was superior to SR morphine.
SC agents	
SC hydromorphone vs SC morphine	In a randomized, controlled trial, SR morphine was superior to SR morphine.
SC morphine, SC hydromorphone, and SC buprenorphine	In two open-label studies, SR morphine was superior to SR morphine.

VOLUME 12 | NUMBER 1 | FEBRUARY 2010

- Geriatric Disorders
- Personality Disorders
